

GALILEI

Be cool, Be alive.

Refrigerated Display Cabinets

General Catalog 2020 Edition

Remote type showcases / Plug-in type showcases /
Backyard kitchen equipment and useful equipment

CLAIR

Send-you

Debut!

Intelligent design that accentuates food.

The flush surface design removes surface unevenness to the utmost limit.

The visual presentation of the framing effect and the LED lighting highlight the food.

A refined presence which adapts to the space without being overly assertive.

These showcases naturally fulfill the mission of accentuating the “food appeal” to the maximum extent while helping to present a store space which is sanitary and attractive.

About the naming

CLAIR means “intelligent” in Latin.

The intention is to provide showcases which balance the two differing objectives of accentuating the food and increasing the store quality at a higher dimension.

The GALILEI GROUP aims to become advanced ESG companies “challenging the cultivation of the future of food and life.”

GALILEI GROUP SDGs

GALILEI GROUP SDGs declaration

At the GALILEI GROUP, we approve of the purpose behind the “Agenda for Sustainable Development Goals (SDGs) by 2030” and aim to realize the happiness of citizens, customers, employees, shareholders, and business partners by balancing the pursuit of corporate economic value with the resolution of social issues.

Declaration 1

Improve the quality of people’s eating habits

▶ Pursue food safety and security

Suppress the proliferation of bacteria with rapid cooling and thawing technologies

HACCP support system

Innovation originating from MILAB

Engineering business which provides complete proposal, design, and construction services

▶ Reduce food loss

Maintain food freshness with the cold chain

Extend the expiration date with Tunnel Freezers

Declaration 2

Take better care of the global environment

▶ Adjust to and mitigate climate change

Convert to low GWP and natural refrigerants

Aim for refrigerant leak detection systems and 10-year refrigerant leak warranties

▶ Contribute to sustainable regional environments

Product-as-a-Service utilizing IT

LCA-conscious product development

Pursue energy conservation

[Supported SDGs]

[Supported SDGs]

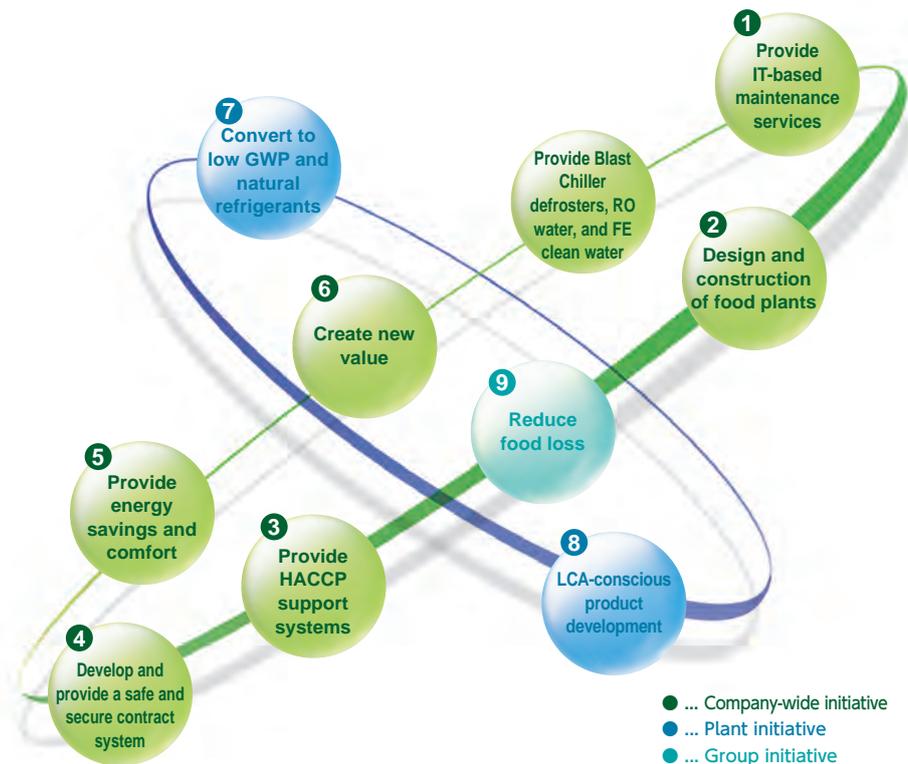

GALILEI GROUP Eco-tech

GALILEI GROUP environmental preservation activities

We have named technologies which can provide safety and security to consumers based on the concept of reducing the environmental load "Eco-tech."

The GALILEI GROUP will continue to improve people's eating habits through our products, systems, services, and proposal abilities to promote the implementation of "Eco-tech" which can be useful to society.

- 1 Maintenance services which utilize AI and IoT to conserve energy and improve the availability of products
- 2 Engineering business which provides complete proposal, design, and construction services for food plants and distribution centers
- 3 HACCP support services centered around "HACCP ExAround" (cloud temperature management system)
- 4 Develop and provide a refrigerant leak detection system. Aim for 10-year refrigerant leak warranties through a maintenance management service
- 5 Provide the Galilei Air-tec System to simultaneously achieve optimization of the in-store environment and comfortable energy conservation
- 6 Create new forms of value through open innovation originating from MILAB
- 7 Develop the Axia-Zero System by combining GALILEI's unique refrigerant control and freezer control technologies with CO₂ freezers
- 8 Promote the development of products with a small environmental load based on the quantity of resources used and disposed from production to disposal
- 9 Provide freezer systems which extend the expiration date with Tunnel Freezers®

Utilizing environmentally friendly refrigerants.

Promote initiatives to reduce the global warming potential to one-tenth of FY 2019 figures with natural and low GWP refrigerants.

Low GWP refrigerants
(R448A, etc.)

Natural refrigerant
(CO₂ refrigerant)

Switched to a non-fluorocarbon foaming agent in the expansion process and reached 0 kg in waste thinner discharge.

We switched the foaming agent used in the expansion process to an HFO with a low warming potential. As a result, we were able to significantly reduce the emission of greenhouse gases. We do not use fluorocarbon foaming agents in the expansion process at any of our domestic plants. Moreover, we contracted with a vendor to recycle the "waste thinner" from the painting process to reach a level of 0 kg of waste thinner by reusing it at the plants.

Non-fluorocarbon
foaming agent

Waste thinner discharge of
0 kg

Pursue food safety and security

HACCP ExAround Temperature management automation!

Keeping records is important for HACCP, but doing so takes time and manpower which leads to concerns about increased management costs and continuity as well as a heavier on-site burden. With HACCP ExAround, you can automatically and accurately record the temperature of the store's refrigerated and freezer showcases and the backyard refrigerator-freezers 24 hours a day. In addition, since it is a cloud service, it is easy to begin.

HACCP ExAround

Automation of the recording reduces the burden and has major advantages.

* Please consult with us regarding the compatible models.

Basic service		Option	
We provide recording and extra services.		In addition, we also offer an optional management system.	
<ul style="list-style-type: none"> Dedicated PC is not required. The data can be viewed on the web. Monitoring 24 hours a day, 365 days a year. Data is recorded even outside of operating hours. 	<ul style="list-style-type: none"> Equipment errors notified by e-mail. Operating data can be downloaded and put to practical use. Report retention period: 2 years 	<ul style="list-style-type: none"> Store power data monitoring Demand control of cooling equipment Notification by telephone when an alarm occurs 	<ul style="list-style-type: none"> Temperature and humidity management Daily and monthly e-mail delivery service Cooling equipment maintenance services

For management of the central food temperature and inspection temperature
HACCP Extender

Use a tablet PC to easily record the cooking and acceptance temperatures, perform sanitation management during entry, and record the cleaning work using touch panel operations.

HACCP Extender

Waterproof temperature sensor (wireless)

Total temperature management system for large-volume cooking facilities

HACCP master V3

Supports efficient temperature management in all processes

Proper temperature management and work recording is extremely important in all processes ranging from inspection of the food ingredients to storage, heating, cooling, reheating and display. The HACCP Master V3 is a system which naturally records the temperature of refrigerators and other equipment, the temperature during inspection of ingredients, and centrally manages all work information on a PC tracking who performed what tasks and when in each process.

Product introduction movie

We hope that you take a moment to view the video introduction to this product.

MILAB

(Osaka Head Office)

Creating new meals in an open setting.

1F

“MILAB Food Laboratory”

Performing evaluation tests and quantitative analysis, etc. directed at food safety and the development of new technologies.

The laboratory scientifically analyzes and evaluates the ideal deliciousness desired by customers. Quantification is advancing the development of menus and equipment.

2F

“MILAB Salon / MILAB Office”

Provides facility assistance and support for launching new businesses.

This is a base for incubation which provides multifaceted support for those who are considering food-related business startups and the deployment of new businesses.

1F

“MILAB Kitchen”

The kitchen is equipped with the latest equipment to develop new products and menus.

The kitchen can be used not only to view the latest equipment and systems from FUKUSHIMA GALILEI but also as a place for customer menu development.

1F

“MILAB Bakery”

The bakery is a place for experiencing the equipment for confectionery production and breadmaking and tackling the challenges of new product and technology development.

It naturally covers processes from dough fermentation to baking and has a connected seminar room which can host lectures using the equipment.

2F

“MILAB Office / Environmental Testing Laboratory”

Replicate any environment and improve your precision while working with actual equipment.

It can also be used to assemble and prototype development products and as a space for product-based workshops.

1F

“MILAB Food Factory Laboratory”

An integrated environment for the pursuit of deliciousness from cooking to refrigeration, freezing, and tasting.

Fully equipped with six Tunnel Freezer® units with different features. Actual ingredients can also be used to perform freezer tests.

1F

“MILAB Store”

The store utilizes the latest technologies to create the next-generation store.

It is a space for next-generation store experimentation and creation including the replication of register-less stores and image-based customer purchasing analysis.

8F

“MILAB Cafeteria”

The cafeteria creates food services to support the health of employees.

It provides meals under expert supervision. In addition, it also researches next-generation services (food services). The cafeteria also functions as a place for employees to interact with each other and as a free address office.

Test kitchen guide

MILAB Kitchen and Bakery (Osaka Head Office) F'S DESIGN COURT (Tokyo, Nagoya, Fukuoka, etc.)

The test kitchens are generally open to customers. They can be used for various purposes according to customer requests.

* Make an advance reservation with a sales representative.

* Please also visit our showrooms in Tokyo, Osaka, Fukuoka, Sapporo, Sendai, Nagoya, Hiroshima, and Okinawa.

Usage examples

- As a place for seminars and lectures
<Ex.> Cooling cooking seminars, daily dish practice seminars, etc.
- Refrigeration and freezing tests
<Ex.> Cooling off fried foods, refrigerating cooked food, freezing Western sweets, etc.
- Cooking tests using RO water
<Ex.> Rice cooking tests using RO water and tap water, etc.
- As a test kitchen for menu development
- Dough fermentation and baking tests using the bakery machines, etc.
- Sanitation management tests using FE clean water, etc.
- Thawing tests using a thawing machine, etc.
- As a place for various types of customer training

Equipment and exhibits

- Blast chiller / Shock freezer
- Bubbling thawing machine
- FE clean water
- Low temperature steamer
- RO water generation devices
- Dough Conditioner
- Ultra-fresh high humidity storage
- Ice-maker
- Food voluntary inspection room
- Temperature management system

* Various other types of equipment including steam convection ovens, vacuum packaging machines, fryers, salamanders, bakery ovens, etc.

Cooling cooking seminars, etc. are also hosted by our exclusive corporate chefs. In addition, we can also host lectures according to customer requests, so feel free to contact us.

OSAKA

TOKYO

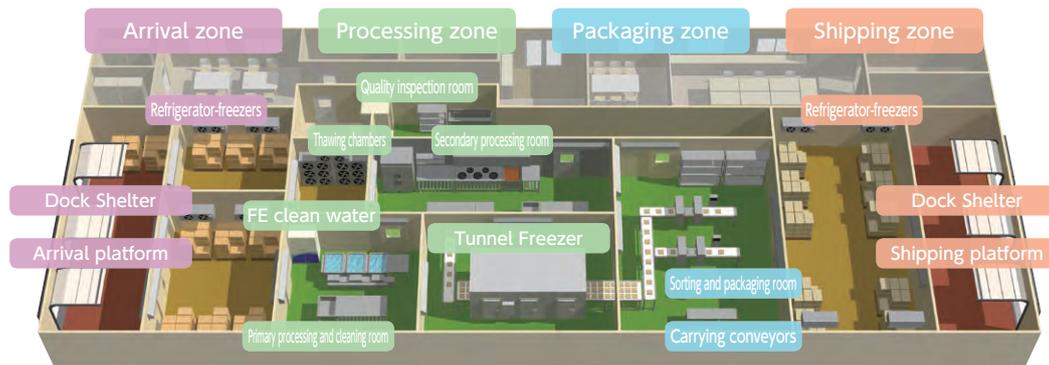

FUKUOKA

Pursue food safety and security

Total support for food plants and distribution centers

Our support system uses the GALILEI GROUP network to offer design, construction, and maintenance services

We provide a wide range of support according to customer needs through the engineering capabilities of the GALILEI GROUP.

- FUKUSHIMA GALILEI Engineering Department [Facility planning (refrigeration and freezing, thawing, air conditioning and ventilation, sterile water, cold water, lighting, management systems, etc.)]
- GALILEI PANEL CREATE [Thermal insulation panels, clean panels, fixtures]
- TAKAHASHI GALILEI [Tunnel (Spiral) Freezer]
- SHOKEN GALILEI [Belt conveyors (automatic conveyors)]

We provide the optimal facility according to the customer's intended use based on temperature control technologies cultivated over many years.

Dock Shelter

Freezers/refrigerators

Cold storage

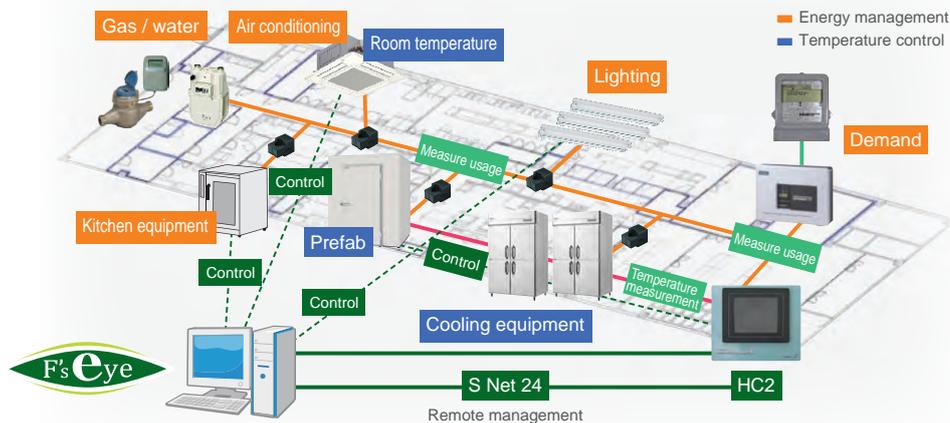

Thawing chambers

"F's eye" management system for food plants and low temperature warehouses

F's eye provides start / stop control and status monitoring of all machinery within a facility to help achieve stable equipment operation. Moreover, it can significantly reduce the time and effort spent by equipment managers through centralized management of temperature and equipment data on a PC.

System illustration

Pursuing food safety and security and reducing food loss

Active role of the GALILEI GROUP in food plants and distribution centers

TAKAHASHI GALILEI CO. LTD.

Tunnel Freezer®

In 1961, we developed, designed and manufactured the world's first continuous quick-cooling, quick-freezing system. In this system, the tunnel's inlet and outlet can be kept open without cool air leaking. Over 60 years since then, the Tunnel Freezer® has been renovated and redesigned for marketing around the world. Challenging all the time for safety and security, the Fukushima people have been keeping customers close to our heart, with Tunnel Freezer® first in mind.

Top class domestic share

Tank type WSJ series

To the tank freezer that is well controllable for hygiene, the quick-cooling, quick-freezing SJ system is integrated for safety and security as well as energy saving feature. In this configuration, the tunnel freezer can handle many tasks: chilled products such as paste seafood, cool-stored prepared dishes, and other frozen and chilled foodstuffs.

Tank type WHN series

The standard quick-cooling tunnel freezer is intended for general-purpose applications. CIP cleaning and steam pasteurization are also possible, and the large wing is designed to visually check the inside easily. The WHN series is more compact than the WSJ series. The 3-layer conveyor design is advantageous for saving space.

Panel type OSJ series

The OSJ series enjoys the number-one choice among the super jet products. In almost all fields, its freezing and cooling performance is valued. Its applications include broiler chicken, frozen noodles, general prepared dishes, seafood, Chinese foodstuffs, patisserie and many others.

Panel type OKF series

Cool air is evenly supplied from the high-pressure chamber. Products are well balanced in freezing from the entire surface. This piece-by-piece freezing style is widely popular, whether in small scale or in large scale, for mixed vegetables, spinach, minced meat, frozen rice pilaf and the like.

GALILEI PANEL CREATE CO. LTD.

Clean panels

Due to the rise in awareness of the customer's environment, safety, and security, the needs required by sanitation management and temperature control are becoming more and more advanced. Using the panel technologies and system engineering cultivated over many years, we contribute to society by meeting customer needs with "environmental creation" technologies that provide high-quality "freezer and refrigeration spaces" and "clean work spaces."

Thermal insulation panels High thermal insulation and non-combustible panels (Refrigerators and freezers)

Defender panels Window system

Sirius doors (single)

Sirius sliding doors

Clean fit doors

Resin cart guard Resin clean baseboard

Development of the "econeal" non-fluorocarbon panels

Since December 2019, all thermal insulation panels and non-combustible thermal insulation panels produced at the Hikone, Shiga plant have switched to "non-fluorocarbon panels" using a new "HFO (hydrofluoroolefin)" foaming agent. In anticipation of next-generation global environmental protections, we began researching products which do not use alternative fluorocarbon five years ago and realized the development of the high-performance "econeal" series.

SHOKEN GALILEI CO. LTD.

Various automatic conveyor systems

Always since its foundation, SHOKEN GALILEI Co. Ltd. has been researching and developing production line machinery and equipment with labor and energy saving in mind. In today's whirlwind of changes, the SHOKEN GALILEI engineers have been coming up with unheard-of technology and creative ideas in response to production system innovations. For delivering superior products, they are doing tireless activities. The SHOKEN GALILEI people are committed to delivering factory automation systems to meet customers' needs today and tomorrow.

Plastic-top conveyor

Covered inclined conveyor

Adjusting to and mitigating climate change

System which makes it possible to reduce environmental loading

Axia-Zero System

What is CO2 refrigerant?

CO2 refrigerant is a next-generation, natural refrigerant with the highest level of safety. With the current R410A and R404A alternative fluorocarbon refrigerants, there is still some remaining impact on global warming. However, the natural CO2 refrigerant has almost no impact on warming, which makes it an extremely environmentally-friendly refrigerant. Moreover, it has a high energy conservation effect which contributes to a significant power consumption reduction of 10 to 15% compared to previous refrigerants.

Characteristics of CO2 refrigerant

- Natural refrigerant:** superior environmental characteristics
- Safe:** non-combustible and non-toxic
- Energy conservation:** power consumption reduction of 10 to 15% (compared to R404A)

	Current refrigerant HFC alternative fluorocarbon		Next-generation refrigerants	
	R410A	R404A	Ammonia	CO2
Ozone Depleting Potential (ODP)	0	0	0	0
Global Warming Potential (GWP)	2090	3920	0	1
Combustibility	Non-combustible	Non-combustible	Slightly combustible	Non-combustible
Toxicity	None	None	Toxic	None

Added security with the GALILEI GROUP

Security with the S Net 24 remote monitoring system

The remote monitoring online system monitors the status of customer equipment 24 hours a day and 365 days a year. Because it can undoubtedly notify you when a problem should occur and detect a problem before it arises, the system enables the optimization of the customer's sales environment.

Introduction results

Introduction of the Axia-Zero System in refrigerated and freezer showcases with the enactment of the Act on Rational Use and Proper Management of Fluorocarbons in Japan in April 2015

Temperature zone
-25 to 5°C

The Company developed and is delivering to stores CO2 freezer systems which use CO2 as the refrigerant in the remote type refrigerated and freezer showcases which are our major products. CO2 is a refrigerant used in electric water heaters, but it has been difficult to produce due to issues such as "lower performance in terms of refrigerant characteristics compared to fluorocarbon refrigerants when used in refrigerator-freezer equipment," "it runs at an extremely high operating pressure which is three to six times that of fluorocarbon refrigerants," and "product and refrigerant piping require high pressure designs which makes it important to ensure safety in the event of a leak." In order to overcome these issues, we collaborated with a freezer manufacturer to advance the development of CO2 freezers. We strengthened the safety measures through actual loading tests and the integration of refrigerant piping in our laboratory. Going forward, we will continue to help reduce the environmental loading even further and promote the delivery of such systems.

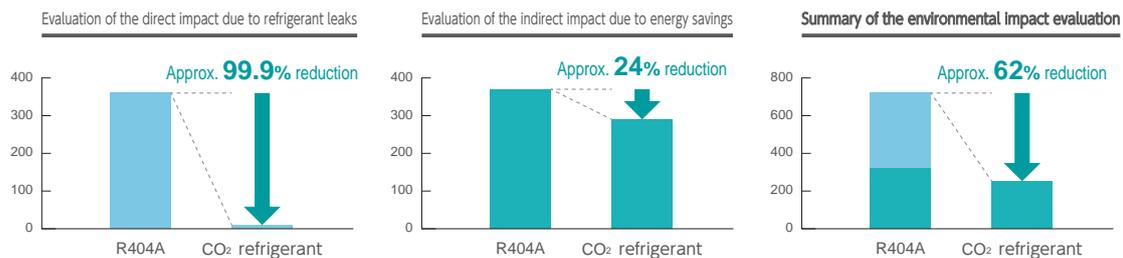

CO2 refrigerant based refrigerated open showcases

CO2 refrigerant based freezer glass door display case

CO2 emissions (tons) by supermarket refrigeration and freezer equipment

Estimate conditions

- (1) Sales floor area: 1,700m² (2) Freezer horsepower: 200 HP (3) CO2 emission factor: 0.000512 tons-CO2/kWh
- (4) Natural leakage amount from the showcase of 16%

Legend: Direct impact (light blue), Indirect impact (dark blue)

Adapting to and mitigating climate change + contributing to sustainable regional environments

Maintenance which considers the environment and customers

The service work to stand by customers who install refrigerator-freezers and showcases through a “24 hour system” starts after the products have been delivered. This includes, of course, maintenance repairs and periodic inspections as well as a support system to address the increasingly stringent regulations of the Act on Rational Use and Proper Management of Fluorocarbons. Not only the customers who actually use the products but also our ability to provide support which is friendly to the global environment are the deciding factors in safety and security.

GALILEI service network of branch stores and sales offices in 70 locations across in Japan	Head Office	Osaka

Contributing to sustainable regional environments

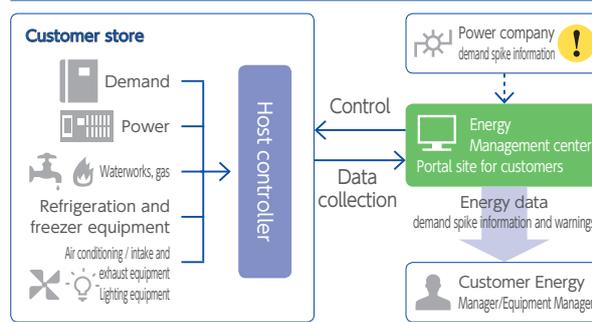

Store total energy management system

BEMS-YOU

This is our unique and fully packaged total energy management system which provides automatic equipment energy conservation control and annual energy conservation consulting support beginning with the visualization of store energy including the kitchen.

- 1 Energy visualization
(power, gas, waterworks)
- 2 Automatic energy conservation control
- 3 Demand control
- 4 Operation improvement consulting

System illustration

Energy visualization

Visualization of electrical power

Enables the real-time verification of energy usage. The data is updated at five-minute intervals to enable the verification of current energy usage even from remote locations. The store energy usage can be converted and displayed in terms of electricity, gas, and water charges. This leads to an increased awareness of costs by employees.

Headquarters batch management reports

Provides batch reporting of the energy usage at contracted stores. The service can also manage the energy usage of each facility in aggregate for chain store developments. It allows you to easily analyze comparisons between the targets and actual results, consumption rates, and the previous year's results to sort by energy usage, etc. The data for each facility can be downloaded as CSV data.

Temperature / power graph reporting

Capable of managing watt-hour meters up to a maximum of 50 points. Up to eight points can be simultaneously displayed on a graph. The graph can be freely configured by time, date, and month to display the results. The measurement data can be downloaded as CSV data. Visualization leads to cost improvements which were previously unnoticed.

Introduction to an implementation example

- Industry: Japanese-style pub chain
- Contract details: 34 stores
- Scale: electricity expenses of 5 million yen annually
- Electricity saving method: automatic control of energy saving equipment in the store

Implementation benefits (annual)

- Quantity of electricity saved: 578,335kWh
- CO₂ reduction: 307 tons (CO₂ emission factor 0.531kg CO₂/kWh)
- Energy conservation efficiency: 10.1%
- Cost reduction: 15.43 million yen
- Investment payback period: 1.8 years

S Net 24 Refrigeration and freezer equipment operating status and error 24/365 remote monitoring maintenance contract

Advantages of implementing S Net 24

- Signing a maintenance contract can limit the occurrence of sudden repair costs.
- Verifies and optimizes the configuration, operating status, and energy usage of each piece of equipment.
- Enables the optimization of each store according to its environment and characteristics.
- Support can also be provided for reduction plans corresponding to revised Energy Conservation Act together with maintenance.

Next-generation air conditioning “Galilei Air-tec System”

Simultaneously achieves the optimization of the food supermarket in-store environment and comfortable energy conservation

Galilei Air-tec System

The [Implementation of Comfortable Store Energy Conservation Through PMV Control Utilizing AI Technology] was awarded the FY 2019 Energy Conservation Grand Prize in the Energy Conservation Best Practice Category by the Minister of Economy, Trade and Industry.

GALILEI's concept for new supermarket environmental measures

The Galilei Air-tec System conceived by comprehensive store planner GALILEI GROUP resolves various environmental problems at supermarkets such as energy conservation, manpower saving, sanitation management, and comfort.

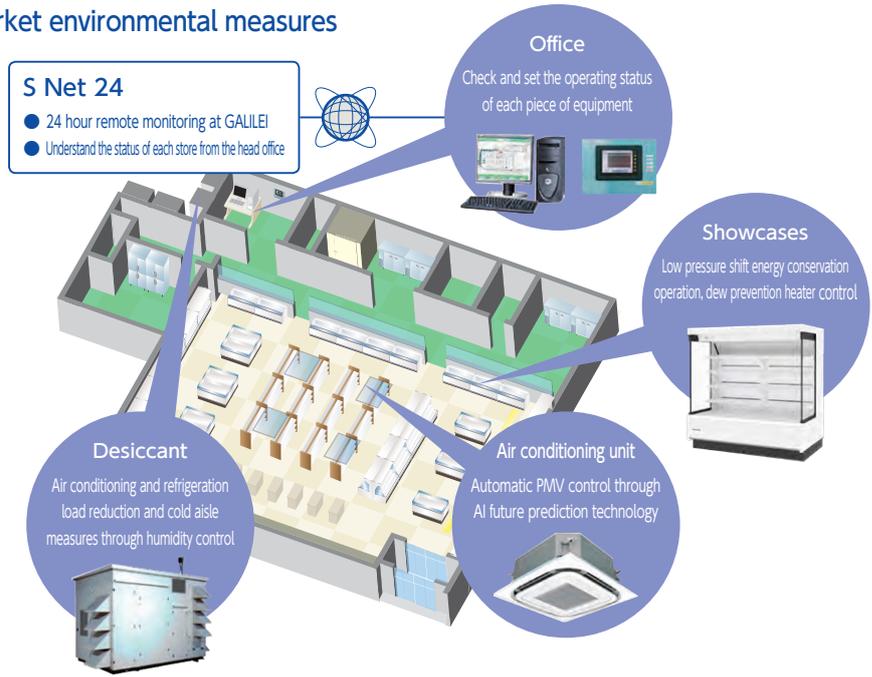

Features of the Galilei Air-tec System

- ① Energy conservation control through AI future prediction
- ② Environmental optimization through PMV^{*} control
- ③ Year-round automatic air conditioning control

* PMV is an index of hot and cold sensations felt by people.

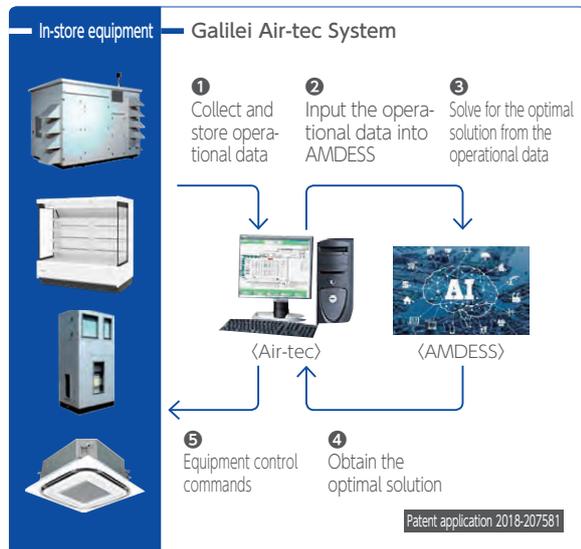

Further energy conservation Condensation and mold measures Cold aisle measures

Solved by the Galilei Air-tec System

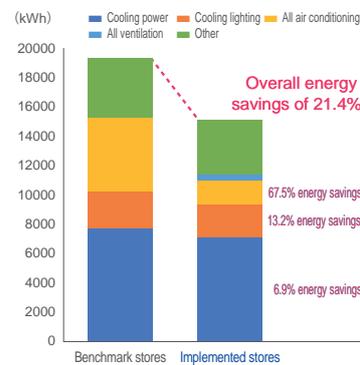

Galilei Air-tec System

A system which achieves a comfortable in-store environment and energy conservation through PMV control utilizing AI technology.

Energy conservation effects

Comparison of energy consumption over one month of the summer season^{*1}

Compared to a typical store in summer
Achieved energy savings of 20% or more^{*2}

Enables a total reduction of running costs^{*3}

Investment payback within 3 to 5 years^{*2}

^{*1} Results from a supermarket with a sales floor area of 2,000 m². ^{*2} To achieve such results, meetings are required to discuss the details of the store work place air conditioning and ventilation equipment, so please contact our sales representatives. ^{*3} Electricity expense reductions, freezer horsepower decrease, and cleaning expense reductions, etc.

Environmental improvement effect

GALILEI Refrigerated Display Cabinets

CLAIR

Send-you

Outstanding **minimal design** all the way down to the fine details. **Hygienic** and **fits every space**.

Pursue the creation of the ideal store according to the spatial concept.

Implements the “flush surface” design based on a concept which minimizes the differences in surface levels. The front and sides of the showcase are continuously connected and can be arranged according to the desired color.

Showcases are kept clean with the appropriate detail processing.

Integrating the design of the front presents a space with a high degree of uniformity.

Integrating the design around the front area presents a sales floor with a sense of uniformity. You can also create an elegant sales floor with beautiful proportions at the junction areas when connecting showcases.

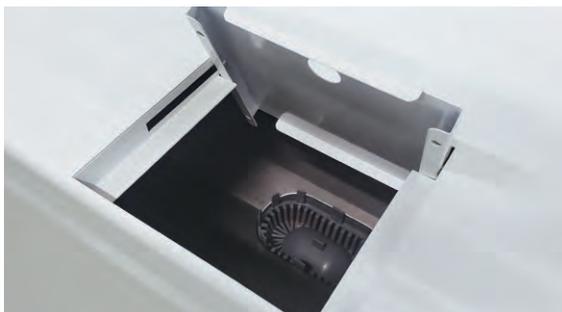

The efficient and beautiful design is not lost when used as an individual or connected unit.

Reexamining the structure of the drain hole significantly improves the cleanliness. (Patent pending)

The structure was changed from one which blocks waste to one which receives waste, and a cleaning window was added to the baseplate. With conventional showcases, all of the products have to be removed when inspecting and cleaning the drain hole, but with this model, only some of the products need to be moved.

* Except for some showcases

Installing a drain hole cleaning window improves the cleanliness.

Light and easy-to-detach shelves make it easy to arrange displays.

We achieved a weight reduction of approximately 14%* compared to our previous models. The bracket was improved and also made easy-to-detach. As always, they continue to ensure the required load carrying capacity.

* In the case of a W1,200mm D400mm shelf

Easily detached with minimal effort.

Elaborate **care** and **ingenuity** that accentuates the food.
 Attracts the user's line of sight and stimulates their desire to purchase.

The customer's line of sight naturally focuses on the food and makes the process of food selection enjoyable.

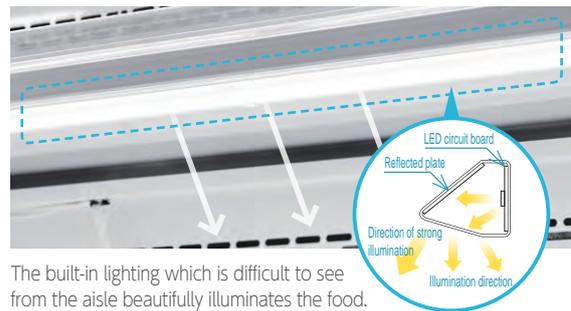

The use of aluminum materials above and below the display space is a technique which naturally focuses the customer's line of sight on the food. This is a psychologically-based design which uses the "framing effect" in which the eyes focus on the picture which decorates the frame.

The "framing effect" accentuates the food within the space.

New LED lights (CLAIR LED) that maximizes the freshness of food.

While preserving the superior energy conservation effects that we have proactively undertaken to protect the global environment, we developed new LED lights (CLAIR LED) which increase the illumination by approximately 20%. Attention was also paid to the designability in developing new built-in lighting which makes the lighting fixtures difficult to see from the aisle. The food is illuminated from a flat top panel to convey the freshness to the maximum extent.

The built-in lighting which is difficult to see from the aisle beautifully illuminates the food.

Minimizes the presence of the shelves to increase the focus on the food.

The color of the front of the shelves can be matched with the showcase interior. Doing so minimizes the presence of the shelves within the showcase and has the effect of accentuating the displayed food.

Aligning the color increases the sense of unity within the showcase.

Standard equipped with a dedicated PC rail for large-sized POPs. The high visibility is an effective way to appeal to customers.

Standard equipped with a large-sized PC rail that also supports B6 half-sized POPs. Improves the visibility and the ability to remove products without hanging a PC below the shelf and effectively appeals to the customers.

* If you select acrylic braces, commercially available PC rails can also be supported as in the past.

CLAIR LED

Roughly 20% increase in illumination compared to conventional products!
A dimming feature is also standard equipped.

**Illumination increase of roughly 20% with the same power consumption.
You can expect an energy conservation effect of roughly 30% by using the dimming features*1 *2.**

An energy conservation effect of roughly 30% can be obtained while maintaining a similar level of illumination compared to smart LEDs (our conventional models) in the golden space (focus area) and the fourth shelf.

	Smart LED (our conventional models)	CLAIR LED		
	Exterior 100% Interior 100%	Exterior 100% Interior 100%	Exterior 120% Interior 60%	Exterior 120% Interior 25%
First shelf	3,970	4,750	2,970	1,672
Second shelf	5,140	6,190	4,136	2,200
Third shelf	4,390	5,120	3,355	1,716
Fourth shelf	3,180	3,740	3,190	1,628
Baseplate	2,830	3,390	2,530	1,298
Focus area	2,130	2,650	2,145	1,100

(Unit: lx)

Conditions / Current Smart LED: 40W type Input power of approx. 15W × 6 bulbs = 90W

CLAIR LED dimming (Exterior 120%, interior 60%): Input power of approx. 15W × 1.2 + 15W × 0.6 × 5 bulbs = 63W

*1 The dimming feature has four levels (25%, 60%, 100%, and 120%) *2 Only the ME color (fresh meat) will be supported soon.

CLAIR LED color variations achieve an enhanced presentation and high color rendering.

LED-R for glass door display cases		LB1001 6	5,700		105°
		LB1002 7.2			
		LB1005 12			
CLAIR high irradiation type High clear LED-Hi		606mm size 15	5,000		60°
		909mm size 22.5			
		1,210mm size 30.4			

Common | Rated lifetime: 50,000 hours | LED material: polycarbonate

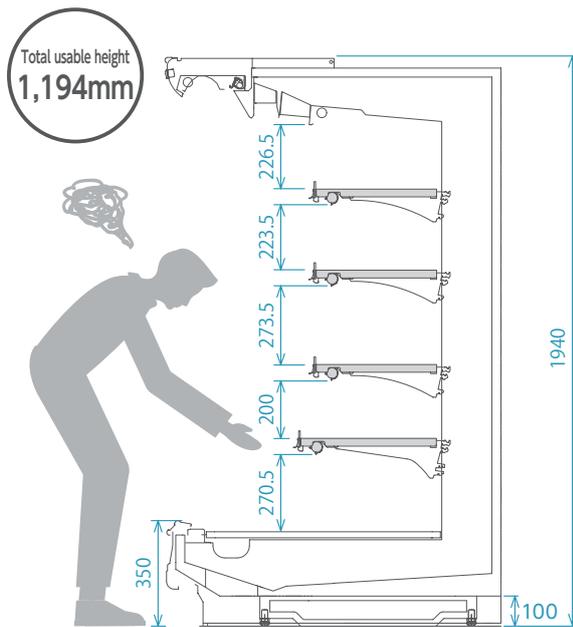

* The numerical values (LED colors and brightness) are measured values and not guaranteed values.

Height of the usable
showcase interior space

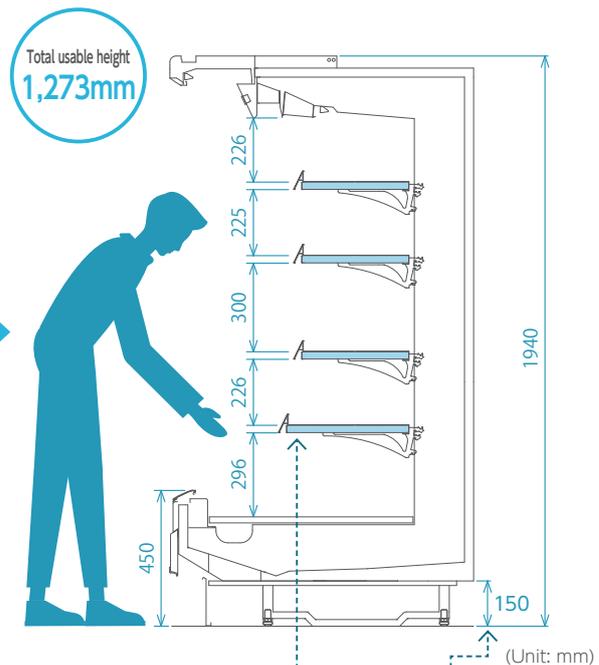

Even if the handrails are raised from 350mm to 450mm, the usable showcase interior space is increased by **roughly 80mm!**

The amount of storage can be increased even if the handrails are changed from 350mm to 450mm.

Our conventional models

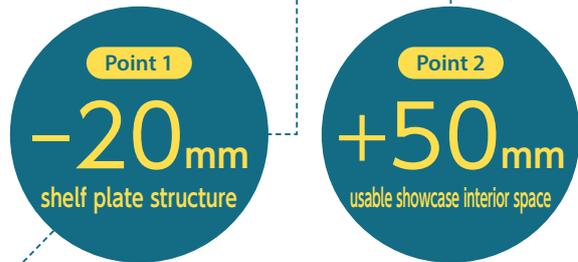

CLAIR Send-you

Comparison of the usable interior total height

	Current handrails (H350)	CLAIR handrails (H450)
Interior to the first shelf (usable height)	226.5	226
First to second shelf (usable height)	223.5	225
Second to third shelf (usable height)	273.5	300
Third to fourth shelf (usable height)	200	226
Fourth shelf to the baseplate (usable height)	270.5	296
Total usable height (considering the shelf thickness)	1,194	1,273

* The pitch with the shelves attached can be changed by 25mm (Unit: mm)

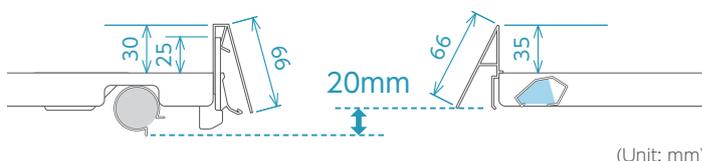

* Conventional 450mm handrails had a frame height of 200mm.

The CLAIR LEDs are approximately 20mm slimmer due to the flat structure of the reverse side of the shelf plate.

With conventional LED lighting, part of the LED juttred out from the shelf plate. Because the CLAIR LED uses a design which is embedded into the top panel, the shelves are roughly 20mm thinner.

Our conventional models

CLAIR Send-you

(Unit: mm)

Energy conservation also achieved.

Compared to the conventional 350mm handrails of 3,630mm multi-deck open showcases for chilled foods, the new 450mm handrails reduce the required freezing capability from 3,270W to 2,550W.

Required freezing capability
decreased by approx. 22%

Pursuing **cooling sustainability** and **energy conservation measures** at a higher level.

Point
1

Pursuing the **retention of perishable freshness**

Twin coolers

Our unique
cooling control program

Point
2

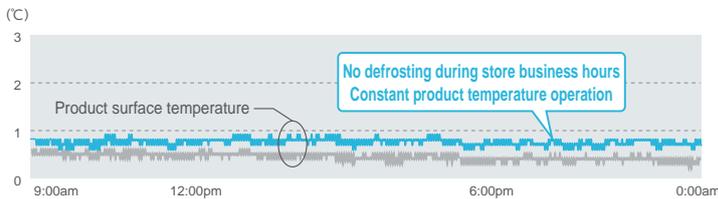

Cooling sustainability significantly improved!! No temperature increase during store business hours!

Using our new, unique cooling method, we developed a new case which does not defrost during store business hours.

Achieves continuous operation with once-a-day defrosting!! (Four times/day for current models)

Product packaging and interior mirrors do not fog up.

Product surface temperature data inside the packaging

Prevents the product deterioration of fresh meat and fish due to heat shock caused by heater defrosting during business hours.

Point
3

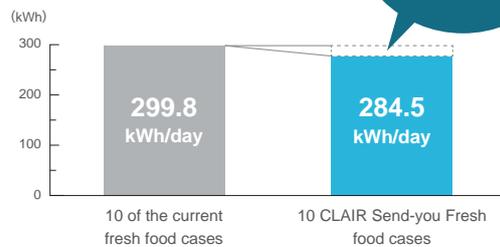

Showcases with no cooling shutdown time during store business hours Achieves **energy conservation** and **peak measure effects**!

The peak measures reduce the amount of electricity during the time period with the highest daily power consumption using the following methods.

- Reduce the amount of electricity with a peak cut
- Shift the load to another time period with a peak shift
- Approx. 5% peak measure effect through defrost control!

In addition to previous demand and power saving controls, we added peak shift control and enhanced the power peak measures.

Power consumption amount

Daily energy consumption reduced by **roughly 5%** compared to typical models!

Point
4

We also offer a lineup of off-cycle defrosting type showcases for fruits and vegetables, chilled foods, and daily dishes! Further **peak measures** are possible across the entire store.

Color
Variations

Increase the level of your store's image by selecting unique colors

Completely coordinated with the store's interior be creative or use different colors for each corner.

Detached Vertical Showcase for Convenience Stores and Small Scale Stores

Open Showcase

CV SERIES

- A smooth, curved form that provides a clean design
- Improved "Golden Space" shelf display space
- Can accommodate 3°C, the control temperature for chilled products
- Supports fresh produce controlled temperatures of 0°C±2°C
- Dual layer air curtain increases energy conservation and cooling ability

Host Controller HC4 COMPACT for small stores

- Monitoring of equipment up to 62 units
- Collectively monitoring temperature, humidity, pressure and the amount of power
- Retains the history up to a maximum of one year
- Centralized control of showcase, refrigerator, and prefab refrigerators
- Collective control of anti-condensation heater control and others
- Use the optional tablet to check and operate from the screen

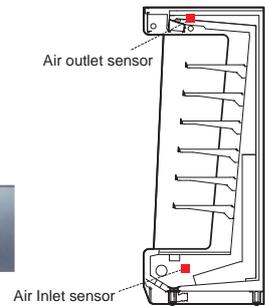

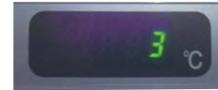

Temperature Detection Controller

Unique 2 point temperature detection control realizes appropriate temperature controls

- Compressor abnormality: COP
- Showcase temperature too high: Hi
- Sensor abnormality: E1

Use the host controller HC4 COMPACT for centralized temperature control in the office.

IM SERIES

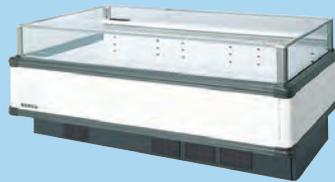

Energy saving showcases that meet sales floor needs.
Can accommodate a wide range of uses.

With 4 faces and being movable, the showcases can be flexibly used to create corners and sales sections.

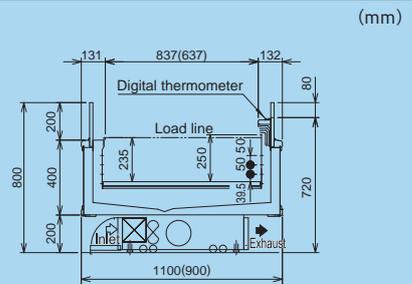

- Adopts an R448A refrigerant with a lower global warming potential for the IM-6 series
- Filter cleaning equipment (fan control system) configured as a new option

IM-66QL SERIES NEW

- Super wide range support with an 1,800mm wide, single phase 100V specification
- The handrail height of 850mm in conventional models was lowered by 50mm to improve the visibility and the ability to remove products
- Internal volume increased by 12% (compared to the IMC(X)-65QWFTAX)

Transparent hood can be attached

Available as an optional attachment.
Suppress the impact of the outside air!
(Supports 900 / 1,100mm types)

Products are easy to remove even when attached!

IoT support (operating history communication feature)

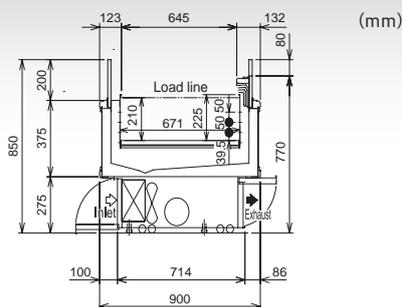

Equipped with a feature that allows a service technician to download the operating history, etc. of the showcase with a smartphone.

Plug-in Type

Inverter Plug-in Type Island Showcase

IMWIDE SERIES

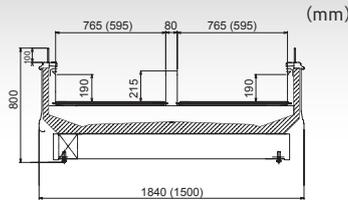

Energy saving showcases that meet sales floor needs. Can accommodate a wide range of uses. Plug-in type dual-sided island showcases which enable corner creation with easy equipment installation.

Achieves drastic energy reduction through inverter control

- Includes drain evaporator unit
- IoT support (operating history communication feature)

Equipped with a feature that allows a service technician to download the operating history, etc. of the showcase with a smartphone.

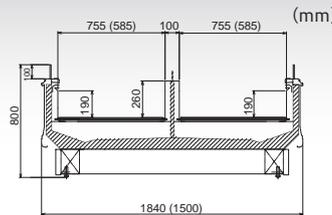

IMW-81RGBTAX

-2 to 15°C Refrigerator type Fresh meat / Fresh fish | Chilled foods | Daily dish

* Outlet plugs are optional with the IM WIDE series.

P specification (switchable per side) supports all A, B, C, and D patterns.

- The temperature zone can be switched with one button in the thermometer display section
- Deck pan standard equipped (also available with stainless steel interiors.)
- Four different product display patterns

Plug-in Type

Inverter Plug-in Type Serve-over Open Showcase

IE SERIES

Also contributes to cold aisle measures on the sales floor as well as reducing freezer unit volume and construction costs.

- Achieves drastic energy reduction through inverter control.
- Provides a handrail height of 800mm and an interior depth of 250mm even though it is a plug-in type showcase and can be connected to other remote type Galilei showcases.
- Installed in a middle island aisle and utilized as a cold aisle measure for freezer waste heat
- Extend the sales floor in an established store without needing to raise the floor pit or drainage
- Includes drain evaporator unit

IoT support (operating history communication feature)

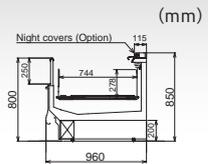

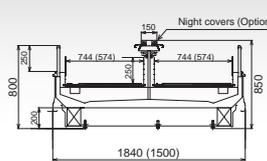

Equipped with a feature that allows a service technician to download the operating history, etc. of the showcase with a smartphone.

Inverter Plug-in Type Multi-deck Open Spot Showcase

ME SERIES

Balances energy saving and freshness management with a built-in inverter freezer unit.

- 1,200mm type single phase 100V specification (supports up to 3°C)
- Reduces interior temperature variations with simple a double air curtain
- Night cover standard equipped
- LED lightning standard equipped on the canopy
- IoT support (operating history communication feature)
- Casters standard equipped
- Includes drain evaporator unit
- Suction filter included

Includes drain evaporator unit

When the temperature indicator displays "FUL," it means that the drain pan is full of water, so remove the drain pan to dispose of the water.

Suction filter included

An attachable suction filter is standard equipped to improve the cleanability.

IoT support (operating history communication feature)

Equipped with a feature that allows a service technician to download the operating history, etc. of the showcase with a smartphone.

- Adopts an R448A refrigerant with a lower global warming potential for the ME-3 series
- Filter cleaning equipment (fan control system) configured as a new option

Shelves variation

Optionally select glass shelves/slide shelves/inclining slide shelves according to the intended use.

MET, MDT SERIES

Recommended for effective space usage.
Flexibly responds to objectives and sales methods.

- Easy to use slide shelves for simple product restocking!
- Uses a single 100V power supply
- Includes drain evaporator unit
- IoT support (operating history communication feature)

Equipped with a feature that allows a service technician to download the operating history, etc. of the showcase with a smartphone.

Plug-in Type

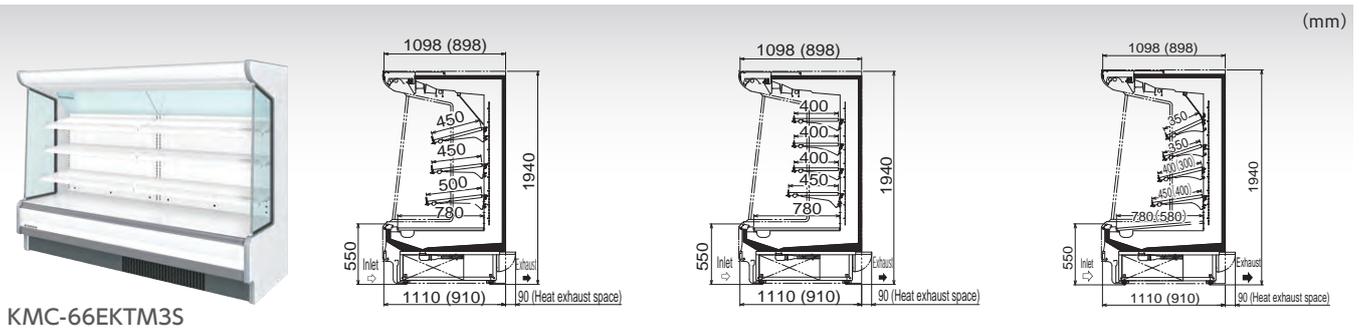

Multi-deck / Semi Multi-deck Open Showcase

KM, HM SERIES

From the three fresh food full line displays to special sales and island displays.
Create various types of sales floors by combining units according to circumstances.

- “Multi-deck cases” are convenient for large capacity displays and a dramatic impact
- “Semi multi-deck cases” make products easy to reach and can be used for self-service or face-to-face service
- Water-cooled specification available
* Cooling water installation separately required
- Rear duct specification (option)

Select from a lineup which supports any application from fresh meat and fresh fish to vegetables!

MF SERIES

Recommended for kiosks in stations, airports, and service areas, etc.

Can also be used to create sales corners which attract customer attention.

- Optimally suited to creating special, face-to-face corners
- Drain evaporator standard equipped for improved maintainability
- Special sales in end locations

MRN SERIES

Recommended for shops stations, airports, and service areas, etc.

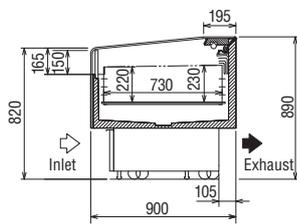

Can also be used to create sales corners which attract customer attention.

- Can be cooled to the temperature zone of ice cream with a 100V power supply
- Incorporates an inverter freezer unit to achieve energy savings of 24% (76% compared to conventional models) in a 1,790mm unit (Q series)
- Wastewater drain tank included
- LED lightning standard equipped
- Casters standard equipped
- Energy savings through converting the internal fan motor to a DC power supply
- Roll-up night covers can also be equipped (option)

Customer-facing Showcases for Patisserie

PTR, ADT SERIES

Close attention was paid to design and function to present an appealing sales display.

Patisserie Showcase

- Adopts an inverter freezer unit to keep products fresh and delicious at a constant temperature and high humidity. Outside air conditions: Temperature of 25°C, humidity of 60%, peripheral wind speed of 0.2m/s or less
- To make it easy to clean, the rail beneath the door is removable and close attention was also paid to the structure of the drain channel
- Standard equipped with a tank that makes wastewater processing easy

High moisture retention with a humidity of 90% or more*
Maintains a constant temperature and high humidity to keep pastries fresh and delicious with our unique freezing cycle technology.
*Measured according to our standards

High transparency double glazing
Adopts double glazing with superior transparency to demonstrate the true deliciousness and freshness of pastries.

LED lightning
Adopts special LED lightning in the space between the light source and the element as well. Brightly and beautifully illuminates the pastries in the showcase.

Air deflector feature
Standard equipped with an air deflector feature which blows air on the glass surface at all times to prevent condensation due to the summer season or the store temperature environment. Ensures a clear field of view.
* Not guaranteed under all conditions.

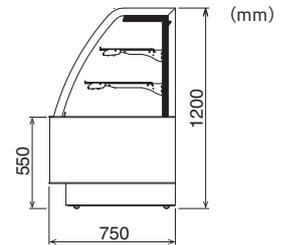

PTR7530

PTR7524

PTR7518

* External appearance for illustrative purposes only. Various colors, sheet linings, and stone linings are available, so feel free to inquire.

Customer-facing Showcase

- All glass sections feature anti-condensation double glazing
- Curved glass specification for a luxurious feeling. Curved glass has no blind spots when viewing the products.
- The shelf trays can be adjusted at a 25mm pitch. They can also be removed.
- Exterior panel sheet is an optional selection. Standard is a black stone grain
- Standard equipped with a tank that makes wastewater processing easy
- Caster specification (φ100mm) available (option: height of 1,240mm)

Large-sized Glass Door Display Case

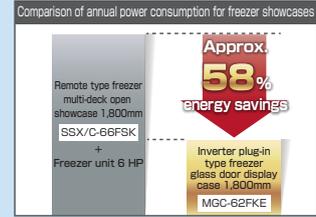

MG SERIES

Units can be connected and used together to present a store space with a high degree of unity.

- Features an effective capacity which is equivalent to the industry's largest remote type freezers
- Refrigerant piping installation not required
- Pitless, drainage equipment not required
- Includes drain evaporator unit
- Door handles with antibacterial specifications
- Inverter internal freezer unit type

* The remote type freezer glass door display cases are listed on page 34.

Energy savings of approximately 58% by replacing remote type multi-deck open showcases with the MG series

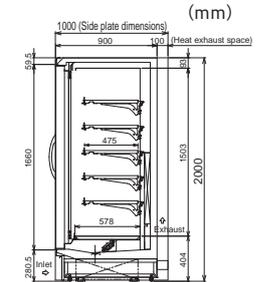

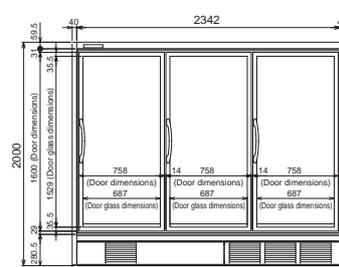

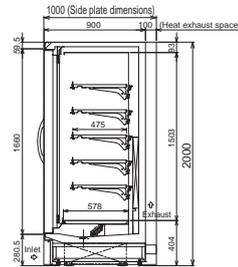

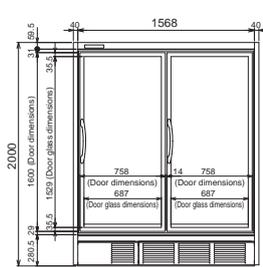

* Estimation based on a sales floor area of 264 square meters and 12 hours of operation over 365 days (Nighttime: lighting off)

Glass Door Display Case

MRS, MRF SERIES

Design updated to beautifully show products. Presents the sales floor in an elegant manner.

- Adopts a DCC system*1 to achieve energy saving operation which surpasses inverter control with a dual compressor capacity control*2
*1: DCC system is an abbreviation of Dual Comp Control (excluding refrigeration types with a width of 600mm and 1,200mm) *2: Compared to our products
- A drain pan is installed in the lower part of the freezer unit, so drainage equipment is not required
(In the event of a large volume of drainage discharge, the drain pan must be removed to dispose of the water)
- Suppresses condensation by adopting glass doors with a condensation preventing heater
- Noise reduction ● LED lightning standard equipped

Service Related Equipment

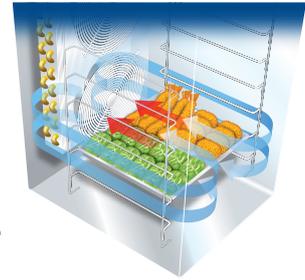

Essential items to reduce time and save labor in daily dish kitchens!

A blast chiller is a piece of equipment for cooling off freshly cooked food or for rapid chilling and freezing.

Blast chiller features

Superior cooling performance through an inlet circulation system

Because it adopts an inlet circulation type of system, it inhibits non-uniform cooling inside the unit. It can rapidly cool while reducing partial freezing or food desiccation. The Interior temperature can be set down to -40°C. (The QXF-005BC5 and QFP-005BC can be set down to -20°C.)

Three cooling modes and operation control systems

Supports the cooling of any type of food or cuisine by combining the three cooling modes of "Pre-cool," "Chill," and "Shock freeze" with the operation controls. The operation control system can switch between "Core temperature operation," "Timer operation," and "Cold air operation."

Core temperature operation

Cools until the core temperature reaches the set temperature and then maintains the cooling.

Timer operation

Cools only for the set period of time and then maintains the cooling.

Cold air operation

Cools until the Interior temperature reaches the set temperature and then maintains the cooling.

Lineup of automated cleaning units also available

This type includes an automated cleaning feature which does not require interior cleaning work. After the cooking is finished, inject a special detergent inside and just press the cleaning button to clean not only the inside but also the vaporizer inside the cooling box as well as automatically rinse and dry. The temperature inside rises to 80°C during the drying process. It sufficiently dries out the inside to maintain more sanitary conditions.

Time for daily cleaning work

Reduced to **1/6** (compared to our products)

[Manual cleaning work: approx. 30 minutes]
[Automated cleaning work time: approx. 5 minutes]

* According to a test by GALILEI using the 12 tray storage type

Automated cleaning detergent for blast chillers included (2L bottle × 1)

* Be sure to use only the specified detergent.

Blast Chiller 100V

1/1 hotel food service tray × 5 storage

QXF-005BC5 Single phase 100V

Stainless steel plate interior
Exterior dimensions: W700×D700×H850mm
Product mass: 100kg
Compressor nominal output: 600W
Power consumption: (Cooling) 877/855W (50/60Hz)
(Defrosting) 512/512W (50/60Hz)

Effective capacity: 87L

- * Straight-type core thermometer standard equipped (×1)
- * Hotel food service trays (option)
- * The inside temperature setting can be down to -20°C

Blast chiller / Shock freezer 12 type

Inside automated cleaning feature type
1/1 hotel food service tray × 12 storage

Built to order

QXC-012SFLV2 Three phase 200V

(Hotel food service tray vertical insertion type)
Stainless steel plate interior
Exterior dimensions: W840×D880(932)×H2,062mm
Product mass: 250kg
Compressor nominal output: 2,200W
Power consumption: (Cooling) 1,785/1,895W (50/60Hz)
(Defrosting) 1,272/1,272W (50/60Hz)

Effective capacity: 286L

- * Straight-type core thermometer with heater standard equipped (×1)
- * Special detergent (2L bottle × 1) included
- * Hotel food service trays (option)
- * The water supply and drainage system is required.

Blast chiller / Shock freezer 6 type (Horizontal)

1/1 hotel food service tray × 6 storage

A steam convection oven can be installed on the top

QXF-006SFLT2 Three phase 200V

Stainless steel plate interior
 Exterior dimensions: W1,200×D750 (802)×H800mm
 Product mass: 145kg
 Compressor nominal output: 1,100W
 Power consumption: (Cooling) 925/975W (50/60Hz)
 (Defrosting) 636/636W (50/60Hz)

Effective capacity: 147L

- * Straight-type core thermometer with heater standard equipped (×1)
- * Hotel food service trays (option)

Blast chiller / Shock freezer

Remote type freezer (inverter)

Built to order 1/1 hotel food service tray × 40 storage

QXF-040SFKS

Stainless steel plate interior with cart specification

Built to order 1/1 hotel food service tray × 20 storage

QXF-020SFKS

Stainless steel plate interior with horizontal hotel food service tray insertion specification

Exterior dimensions: W1,290×D940 (1,061)×H2,250mm
 Product mass: 320kg
 Compressor nominal output: 4.5kW (remote type)
 Power consumption: (Cooling) 285/285W (50/60Hz)
 (Defrosting) 2,527/2,527W (50/60Hz)

Effective capacity: 864L

- * Straight-type core thermometer with heater standard equipped (×2)
- * Cart and hotel food service trays (option)
- * Dimensions differ depending on the cart used.

Refrigerant (R-410A)

Thickened drink server

Provides thickened tea and water / hot water to prevent choking.
 Automates the thickening work and distills a uniform viscosity (LST value) with one button.

1 Distill a drink containing a thickener (levels 1 to 3) with one button press

2 Can be set to four patterns of flavors and thickness levels

3 Can also be used as a regular tea dispenser

4 Cleaning button prevents blockages

Easy operation panel

Patent pending

- Resolves lumps and irregularities due to individual differences
- Prevents errors due to mixing the wrong amount of thickener
- Reforms the work by reducing the effort required for the mixing task
- Easy to take care of! Equipped with a cleaning feature

The automated cleaning can be set after distilling every five cups or four times a day.

● Rich variety of flavors

Drinks with various flavors can be distilled by changing the drink powder. You can select from many drink variations including green tea, roasted green tea, barley tea, coffee, and sports drinks.

* Use the specialized drink powders and thickeners.

* To remove any irregularities, stir the distilled drink two or three times.

Bakery Related Equipment

Bakery Related Equipment

Service Related Equipment

Fresh baked goods now available from the bakery! The bakery is an essential corner in a food supermarket.

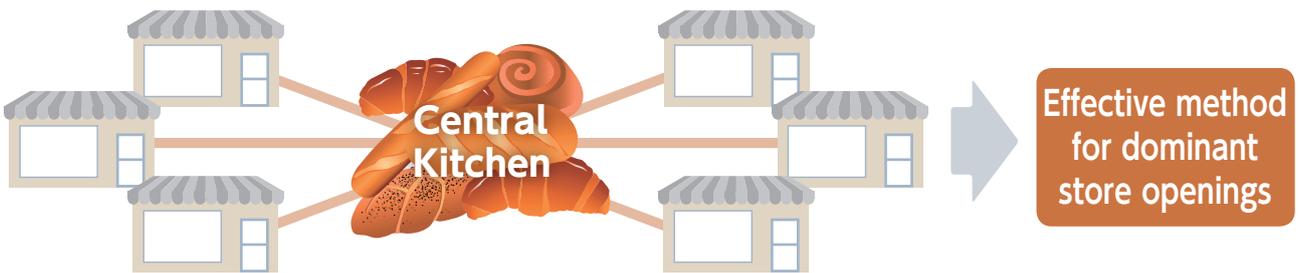

When it comes to fresh food at a food supermarket, fruits and vegetables, meat, and fish come to mind, but it is becoming common to add daily dishes and bread to the list of five fresh food products. In addition to being fresh, it is a fundamental rule that bread must be freshly baked.

Fukushima GALILEI proposes a bakery corner that can be operated with the minimum investment, space, and personnel.

In-store bakery of the future

TYPE 1

Delivery from a central kitchen to satellite stores

TYPE 2

Introduction of a bakery

Method using frozen bread dough (bake off)

Introducing the Minimum Bakery Approach

What's Minimum Bakery

Minimum Bakery: An approach which anticipates the typical bakery revenues to meet the demand with the minimum equipment.

Diligently baked with the minimum equipment

Display freshly baked bread on the sales floor at all times

Bake four times or more per day

Sold out = products are gone

Gain support from the residents (consumers)

TYPE 3

Collaboration with a locally famous bakery

Introduce a full bakery through a collaboration with a famous bakery

Food manufacturers

Improves the ability to attract customers despite the capital burden

Famous bakery

Possesses the know-how and personnel but lacks the capital

Collaboration with a famous bakery

Efficiency and quality stability

- Utilize dough conditioner

- Utilize high humidity dough storage and a refrigerated fermentation chamber (utilize an ultra-fresh high humidity chamber)

Necessity of an In-store Bakery

Maturity of the bread market

Diversity and sophistication of resident (consumer) preferences

Wholesale (less)

Fresh bread (demand increase)

Fresh baked bread becomes an essential corner

Shift to an in-store bakery

Minimum Bakery equipment example

Thawing Box Equipped with Stepwise Run Function

High-quality thawing of food without the hassle

- This series of thawing boxes is conveniently equipped with a refrigerating chamber and a cooling off feature.
- The thawing chambers can be configured in two steps with the unit switching to a cooling box after the thawing.
- The interior fan is designed with a waterproof specification. In addition, the tray brackets and shelf columns can be easily removed for superior cleanability.
- Units adopt a wall cooling method to achieve stable thawing quality.

Thawing operation: 2 to 25°C Cold storage operation: 0 to 10°C Cooling off operation: 2 to 20°C

Built to order

QDD-08DDMDF Three phase 200V
 (Upper chamber thawing/lower chamber thawing/with freezing function)
 Exterior dimensions: W755×D800×H1,950mm
 Product mass: 175kg
 Power consumption: (Cooling) 761/831W (50/60Hz)
 (Warming) 2,420W (50/60Hz)
 Effective capacity: Upper chamber 235L
 Lower chamber 232L
 * Tray (W450×D650×H25mm) included.

Built to order

QDD-08DDMD2 Three phase 200V
 (Upper chamber thawing/lower chamber thawing)
 Exterior dimensions: W755×D800×H1,950mm
 Product mass: 140kg
 Power consumption: (Cooling) 359/391W (50/60Hz)
 (Warming) 2,370W (50/60Hz)
 Effective capacity: Upper chamber 235L
 Lower chamber 232L
 * Tray (W450×D650×H25mm) included.

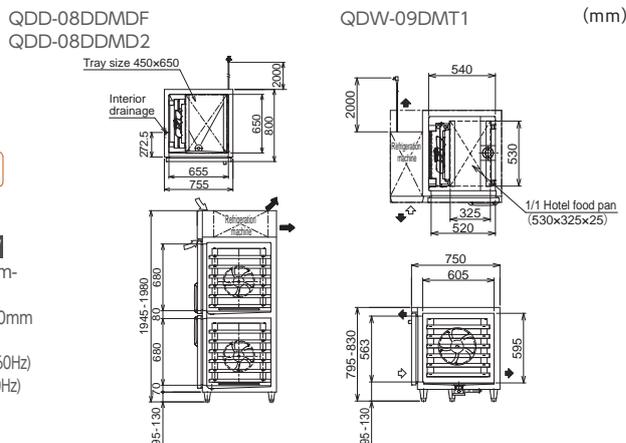

High-quality thawing in two steps

Performs rapid high temperature thawing up to a temperature where the food quality does not degrade and switches to low temperature thawing at the moment when the surface temperature rises to prevent quality degradation and thaw the food in a short period of time. It automatically transitions to cooling mode after the thawing process.

QDW-09DMT1 Single phase 100V
 (Horizontal type)
 Exterior dimensions: W900×D750×H800mm
 Product mass: 80kg
 Power consumption: (Cooling) 155/161W (50/60Hz)
 (Warming) 1,068W (50/60Hz)
 * 1/1 hotel food pan included

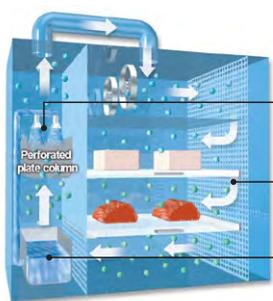

Thawing operation: 2 to 25°C Cold storage operation: 0 to 10°C Interior drying mode: 50°C

High-humidity Air Thawing Clean-defroster

Two-year free maintenance and inspection contract included

Achieves high-quality thawing of large quantities of frozen food

Structure of the Clean-Defroster

- Cleans and humidifies the interior air with a unique perforated plate column
- Clean air circulates internally at a high humidity and low temperature
- The water in the tank is discharged after each run so that it is always clean

Built to order

QDM-130CM6 Three phase 200V
 Exterior dimensions: W1,300×D798 (848) ×H1,920 (2,060)mm
 Interior temperature setting range: -15 to 30°C Interior humidity 90% or more
 Power consumption: (Cooling) 761/817W (50/60Hz)
 (Warming) 3,270/3,340W (50/60Hz)
 Product mass: 320kg
 Standard processing volume for one cycle:
 100kg (maximum of 300kg per day)
 * The clean thawing machine has been co-developed with Nippon Light Metal Co., Ltd.
 * The water supply and drainage system is required.

Low-temperature Dry Box

Two-year free maintenance and inspection contract included

Great for dry processing of homemade dried fish and other foods!!

For supermarkets, processed marine product plants, pubs, and delicatessens, etc.

Low-temperature dry box

A dedicated processor which keeps fresh fish and other foods at a low temperature and quickly and uniformly dries the food inside the box. In order to dry the food inside the box in a refrigerated state, it suppresses the growth of bacteria to uniformly dry process the food.

Prevents the transmission of odors with a standard-equipped photocatalytic deodorizing device

Built to order

QLD-080DM Single phase 100V
 Exterior dimensions: W770×D800×H890mm
 Working temperature range: drying operation 3 to 10°C
 cooling operation fixed at 3°C
 Power consumption: (Cooling) 905/918W (50/60Hz)
 (Defrosting) 527/630W (50/60Hz)
 Storage capacity: shelf net (W468×D454mm) 7 levels
 Product mass: 95kg

Safe and secure with FE CLEAN WATER

Electrolytic hypochlorite water displays high anti-bacterial and sterilizing effects

FE CLEAN WATER is a weakly alkaline water solution primarily composed of sodium hypochlorite obtained by electrolyzing a saline solution with a diaphragm.

The Ministry of Health, Labour and Welfare reports that it is the equivalent of a dilute solution of the "sodium hypochlorite" food additive and can be used for killing germs and cleaning food.

Powerful sterilizing effect

Disinfects vegetables, meat, fish, etc. and cleans and removes the bacteria from cooking utensils and processing machinery.

Does not damage food

The pH is almost neutral (weak alkalinity) and has little effect on food, which makes rinsing after sterilization easy.

Gentle to people and the environment

When used at a low concentration, the pH is almost neutral with no worries about rough hands. The raw materials are water and salt, so it is an environmentally-friendly sterilizing water.

Removes grime and odors

FE CLEAN WATER has a deodorizing effect by removing the grime and bacteria which cause odors, and it can also be effectively used on floors and drain holes by attaching a hose.

Electrolytic Hypochlorite Water Generating Equipment (FE CLEAN WATER)

HACCP-compatible

Easy installation type

▼ Installation illustration
(Left) Switch cock
(Center) Main unit
(Right) Saline solution tank

FES-08S Single phase 100V

Exterior dimensions: Main unit W250×D110×H335 (310)mm
Saline solution tank W160×D160×H224mm
* () is when wall-mounted

Product mass: Main unit approx. 5.0kg
Saline solution tank approx. 0.5kg (empty mass)

Power consumption: 75/75W
Generated water: pH 7.5 or higher

Generated water	Effective chloride concentration	Generated volume
	40ppm	8L/min
	50ppm	6L/min
	100ppm	2.4L/min
	200ppm	1.2L/min

Piping construction is not required

Because it is only attached to the water supply tap, customers can easily attach and move it.

Switchable between tap water/electrolyzed water

Because a switch cock (electrolyzed water/tap water) is included, the steps up to the cold water rinsing process can be performed with one faucet. This product is easy to introduce into existing equipment, because it is normally able to use tap water directly.

Under-counter type

FES-12L Single phase 100V

Exterior dimensions: Main unit W250×D210×H320mm
Saline solution tank W160×D160×H244mm

Product mass: Main unit approx. 10kg
Saline solution tank approx. 0.7kg (empty mass)

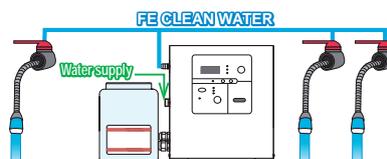

Power consumption: 250/260W

Maximum generated volume 12.5L/minute

With a high generation capacity, it can supply 12.5L/minute at 40ppm. The chloride concentration can be set to four different levels.

Multiple taps can be attached

As long as they are not used simultaneously, taps can be installed in multiple locations to ensure the quantity of generated water.

Convenient dedicated manual faucet (option)

Increase the durability by attaching the optional dedicated manual faucet.

All-in-One type

Built to order

FE-1U-10000 Single phase 100V

Exterior dimensions: W1,000×D600×H1,790mm
Product mass: 150kg (empty mass)
approx. 300kg when full

Power consumption: 500W

Generated water	Chloride concentration	Daily production generated volume
	40ppm	10000L
	80ppm	5000L
	100ppm	4000L
	200ppm	2000L

Water storage tank not required! Generate large volumes of sterilizing water in a small space!

Adjustable between 40 to 200ppm. Supplies approx. 10 tons per day at 40ppm!

Maximum generated volume 10000L/day

What is a reverse osmosis membrane filtration system (RO system)?

It is a cutting-edge purification system which selects and passes through water molecules from an aqueous solution in which various substances are dissolved by using a semi-permeable membrane with a countless number of ultrafine openings. Those openings, which are smaller than bacteria and viruses, produce “safer water” which is gentle to our bodies.

RO water is optimally suited for use as cooking water to accentuate the taste of food!

Advantages of RO water

Constant reassurance thanks to RO water

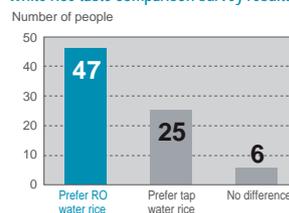

RO water removes not only impurities which are harmful to our bodies but also the carcinogen trihalomethane to the maximum degree. It can also be safely used when taking medications or providing milk and baby food to infants.

Type	Reverse osmosis membrane (RO water)	Alkaline ionized water	E-water	Natural stone water
Technology	Micro-filter, high-purity activated carbon, reverse osmosis membrane	Non-woven fabric filter, general activated carbon, other	Carbon, other	Micro-filter, fabric filter, activated carbon, natural stone
Removed items				
Chlorine, chlorine odors	○	○	△	○
Musty odors	○	○	△	○
Bacteria, viruses	○	△	×	△
Iron powder, lead	○	△	×	△
Trihalomethane	○	△	×	△
Environmental hormones	○	×	×	×
Mercury, cadmium	○	×	×	×
Dioxins	○	×	×	×
Nitrate nitrogen	○	×	×	×

Make it more delicious with RO water

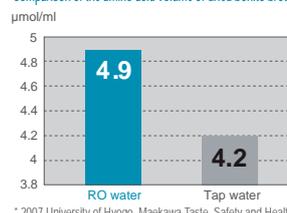

RO water is also ideally suited to bringing out the essential flavors of ingredients in cooking. Broths, rice, and cooked foods turn out deliciously while retaining the vitamins and nutrients for a healthy meal. Moreover, it is also useful for coffee and tea, as well as for watering down whiskey and shochu.

White rice taste comparison survey results

* Based on the results of a survey independently conducted by Fukushima GALILEI

Comparison of the amino acid volume of dried bonito broth

* 2007 University of Hyogo, Maekawa Taste, Safety and Health Laboratory "Comparative Study on Amino Acid Composition in Bouillons Extracted from Bonitos and Seaweeds"

Cooks rice softly

Brings out the delicious flavors of ingredients!

ROKH-16 Single phase 100V

Exterior dimensions: W600×D600×H1,800mm
 Product mass: 300kg
 Power consumption: 85W during standby
 720W during purification
 RO water generating capability: 10L per minute (at 25°C)

Exclusive and reliable support

Water quality safety guarantee

In addition to monthly water quality tests and bacteria tests every four months, an annual test is performed by a public institution with the details and results stored as data. The filter is periodically replaced to support water safety and security. This support agreement must be signed in order to deliver “safe water” at all times. (Not available on some models)

S Net 24

Option

Greater reassurance with S Net 24 support

Supported by the “S Net 24” remote monitoring service net system. Receive notifications about equipment errors by telephone, e-mail, and fax and perform maintenance in real-time according to the situation for peace of mind delivered 24 hours a day. (Not available on some models)

Customer-satisfying services

RO Water Vending Machine

The RO water vending machine attracts people and creates new connections with customers.

Refrigerated Cold Locker (Coin type)

Standardly equipped with plasma light deodorizing

Return type

Built to order

HPM-8RR9 Single phase 100V
Cold Locker (Using 100 yen coins)

HPM-8RR9-5 Single phase 100V
Cold Locker (Using 500 yen coins)

Interior temperature: 2 to 12°C
Exterior dimensions:
W1,000×D544 (569)×H1,815mm
Effective unobstructed capacity:
36L × 8 spaces (Total : 288L)

Return type and glass door

Built to order

HPM-8RR9-G Single phase 100V
Cold Locker (Using 100 yen coins)

HPM-8RR9-G5 Single phase 100V
Cold Locker (Using 500 yen coins)

Interior temperature: 2 to 12°C
Exterior dimensions:
W1,000×D544 (569)×H1,815mm
Effective unobstructed capacity:
36L × 8 spaces (Total : 288L)

*Other models of coin type (pay-type) and key type lockers are also available.

Ice-maker

Thanks to our company unique injection tube part structure, water is circulating well and ice is ready with less impurities.

Chip ice auger system under-counter type

Built to order

FIC-A100CT Single phase 100V
Ice-maker 100kg type
Exterior dimensions: W600×D600×H800mm
Ice-making capacity: Approx. 90/100kg per day
(Room temperature 20°C, water temperature 15°C)
Approx. 75/82kg per day
(Room temperature 30°C, water temperature 25°C)
Ice storage amount: Approx. 34kg
(Approx. 28kg at the time of natural dropping)
Product mass: 61kg
Power consumption: 424/451W
Water amount consumption: Approx. 0.10/0.11m³ per day
(Room temperature 20°C, water temperature 15°C)
Approx. 0.08/0.09m³ per day
(Room temperature 30°C, water temperature 25°C)
(50/60Hz)

Flake ice under-counter type

Built to order

FIC-A120FTL Single phase 100V
Ice-maker 120kg type
Exterior dimensions: W900×D600×H800mm
Ice-making capacity: Approx. 108/118kg per day
(Room temperature 20°C, water temperature 15°C)
Approx. 87/96kg per day
(Room temperature 30°C, water temperature 25°C)
Ice storage amount: Approx. 46kg
(Approx. 26kg at the time of natural dropping)
Product mass: 70kg
Power consumption: 401/428W
Water amount consumption: Approx. 0.11/0.12m³ per day
(Room temperature 20°C, water temperature 15°C)
Approx. 0.09/0.10m³ per day
(Room temperature 30°C, water temperature 25°C)
(50/60Hz)

Powerful ice-making capacities with a compact size

Slim-type vertical type

Three phase 200V

FIC-A240KV2S
Ice-maker 240kg / Ice storage 110kg type
Exterior dimensions: W700×D670×H1,640mm
Ice-making capacity: Approx. 235/250kg per day
(Room temperature 20°C, water temperature 15°C)
Approx. 200/210kg per day
(Room temperature 30°C, water temperature 25°C)
Ice storage amount: Approx. 110kg
(Approx. 85kg at the time of natural dropping)
Product mass: 126kg
Power consumption: 1,015/1,195W
Water amount consumption: Approx. 0.38/0.40m³ per day
(Room temperature 20°C, water temperature 15°C)
Approx. 0.32/0.33m³ per day
(Room temperature 30°C, water temperature 25°C)
(50/60Hz)

Under-counter type

Single phase 100V

FIC-A95KT2
95kg type
Exterior dimensions: W1,000×D600×H800mm
Ice-making capacity: Approx. 87/96kg per day
(Room temperature 20°C, water temperature 15°C)
Approx. 70/79kg per day
(Room temperature 30°C, water temperature 25°C)
Ice storage amount: Approx. 45.9kg
(Approx. 22.2kg at the time of natural dropping)
Ice-making system: Cell-type, Jet-spray type
Product mass: 68kg
Power consumption: 365/430W

Precautions for use

Before and during installation

Waste heat and the install location (conditions)

- Establish a heat exhaust space at the rear when installing against a wall.
- When installing units back to back, establish a wider heat exhaust space or place a heat exhaust divider.
- When installing a large number of units, it is recommended that you use remote type showcases.
- Avoid installing a unit near an air conditioning duct, doorway, or other location where it is exposed to wind or direct sunlight.
- Avoid installing units outside.
- Please note that the installation conditions may differ according to the product.

Electrical work

- Be sure to check the power supply specification for the product.
 - Single -phase 100V
 - Three -phase 200V
 - Single -phase 200V
 - Dual-power supply (single -phase 100V/three phase 200V)
- Be sure to establish a dedicated circuit.

Drainage

- Perform drainage work in advance for the remote type showcases and the KM and HM series.
- Do not touch the internal electrical equipment or wiring. You may receive a dangerous electrical shock. In addition, do not place your hand or a narrow rod inside the freezer unit.
- Do not splash water directly on to the product. Doing so may damage the electrical insulation and cause an electrical shock.
- Customers should not attempt to repair a unit on their own. Due to the dangers involved, please call a service technician.
- A label describing the precautions for use is attached to the product.

IE: Island Showcases
- Body thickness**
L : Ultrawide type
W : Wide type
E : Regular type
- Case width**
8 : 2,438mm
6 : 1,829mm
5 : 1,700mm
4 : 1,360mm
- Model change No.**
IE: 1
- Operating temperature range**
F : Ice / Frozen foods
- Handrail height**
E : 800mm (including the IEE connection)
W : For connecting with IEW
L : For connecting with IEL
- Body height**
B : 800mm
S : end case
- Freezer unit / Power supply**
T : Air cooling Three-phase 200V
- Waste water processing system**
A : Drain evaporator unit system
N : Direct waste water system
- Canopy specification**
X : Standard specification (no lighting)
T : Non-refrigerated shelf specification (with lighting)
- Standard**
R : Standard

Annual power consumption

- Displayed for products which have best-in-class standards established as specified equipment under the Act on the Rational Use of Energy (Energy Conservation Act).
- The annual power consumption displays the value obtained through the measurement and calculation methods determined by JIS B8631-2 (2011 edition).
- The annual power consumption is displayed for standard products with no additional features (options). The annual power consumption may increase for products with additional features (options).
- The annual power consumption during use may fluctuate according to the installation method, the indoor temperature settings, ambient temperature and humidity, frequency of door operation, quantity and temperature of newly stored food, and the method of use, etc.

Annual power consumption

Classification name ^{*3}	JIS B8631-2 (2011 edition) annual power consumption measurement method											
	Closed type			Open type								
	1A	1B	1C	1D	1E	1G	2A	2B	2C	2D	2E	2F
Interior temperature (°C)	8	8	8	8	-18	-18	8	15	4	8	-18	-15
Number of door operations	Once every 10 minutes, 36 times/6 hours for each door						No doors					
Ambient temperature	25°C											
Ambient humidity	60%											
Air flow	0.2±0.1m/s											
Annual power consumption display	Annual power consumption (kWh/year) (daily power consumption for 365 days)											

*3 The classification names are the names indicated in the "Energy Consuming Device Manufacturer Criteria Regarding the Improvement of Showcase Energy Consumption Performance" in the Ministry of Economy, Trade and Industry Public Notice No. 30 (February 24, 2017).

Energy conservation mark

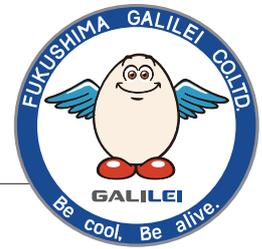

- The mark indicates the energy conservation performance with models achieving 100% of the target value set by the nation shown in green and those at less than 100% shown in orange. The "energy conservation standard achievement ratio" indicates the achievement ratio with respect to the standards established by the Energy Conservation Act. A higher numerical percentage indicates a superior energy conservation efficiency.

Cooling volume of plug-in type showcases

- The "cooling volume" displayed in the catalog is based on Japanese Industrial Standards JIS B8631-2 (2011 edition), and was calculated when the interior components such as shelves and cases which have no impact on the cooling features and can be removed without tools have been removed. This "cooling volume" includes the "food display space" and the "cold air circulation space."

⚠ Safety precautions

- The products shown in this catalog are for indoor use. They should be used and stored in locations away from rain. Always carefully read the Operation Manual and Installation Manual prior to use to ensure proper usage. ● Installation, electrical wiring, and plumbing are required. Please consult the store where the product was purchased or a qualified professional. ● Do not place volatile, flammable materials such as ether, benzene, alcohol or lighter tanks in the cabinets. There is a danger of explosion. ● Please use for temporary storage of foods. Do not put medical products or research samples in the cabinets. Use for anything besides the intended purpose may cause problems such as a degradation of quality of the stored item. ● During the rainy season, or other times when humidity is high, condensation may form on outer surfaces or the surface of water supply / drainage pipes, and therefore the floor may get wet. Please install the equipment where this will not cause a problem. ● Please use with an ambient temperature in the range 5 to 35°C. If the temperature drops to or below 0°C, the water supply pipes of the equipment may freeze and burst.
